EDUCATION

DDU Gorakhpur
Bachelor of Arts

Gorakhpur
Aug 2019 – June 2022

Institute of Management Studies
Master of Computer Application

Noida
Aug 2022 – July 2024

WORK EXPERIENCE

Software Engineer – Full Time

Shine and Standard Pvt Ltd (Client: Max Healthcare)

Gurugram
Sep 2025 – Present

Description: Acting as the project lead for software development within the Max Healthcare domain. Responsible for managing the entire project lifecycle, leading vendor and client communications, and developing specialized healthcare applications using ZOHO Creator and RPA.

Key Contributions:

- Supported project management activities for multiple healthcare IT initiatives, collaborating with external vendors and Max Healthcare teams to ensure smooth delivery and project alignment.
- Contributed to the design and development of a **Critical Medicine Tracking Application** that improved secure medicine delivery from doctor prescription to nursing station.
- Developed and implemented **RPA automation workflows** that reduced HR onboarding/offboarding processing time by **50%**, minimizing manual effort for the operations team.
- Automated TB patient registration, ID creation, and lab result updates on the **Ni-kshay** (Government TB Portal) using RPA, improving data accuracy, reducing manual entry, and ensuring compliance with government healthcare reporting standards.
- Created and deployed **custom healthcare process applications** using **ZOHO Creator low-code platform**, improving digital workflows for pharmacy, duty management, and approvals.
- Performed end-to-end **QA, UAT, and functional testing** of vendor applications, helping reduce post-release issues and increasing system reliability.
- Assisted in gathering technical and functional requirements, ensuring accurate feature implementation and improved user experience for medical and administrative staff.

Associate Analyst – Full Time

Global Logic

Gurugram
July 2024 – Aug 2025

Description: Improved AI-driven fraud detection and user engagement by optimizing data pipelines, enhancing machine learning models, and developing interactive dashboards for real-time insights. Collaborated with product teams to design test plans, executed test cases, reported bugs, performed API testing, Manual web testing and ensured quality deliverables.

Key Contributions:

- Conducted data cleaning and analysis for **AI-driven fraud detection models**, improving detection accuracy by **15%**. Identified key data anomalies and feature engineering techniques to enhance model input quality. Worked closely with the data science team to optimize dataset structure for more reliable results in real-time fraud detection.
- Assisted in testing and optimizing machine learning models, enhancing performance by **10%**. Participated in hyperparameter tuning, cross validation, and **A/B testing** to identify the most efficient algorithms. Worked with model performance metrics to ensure accuracy, precision, and recall align with business requirements.
- Created visual dashboards for business stakeholders, leading to more informed decision-making. Developed interactive reports using Tableau and Power BI, providing real-time insights into AI model performance and business metrics. Collaborated with senior leadership to define key performance indicators (KPIs) for continuous monitoring and optimization.
- Supported cross-functional teams in data-driven projects, improving AI model efficiency and user engagement. Coordinated with business analysts, product teams, and data scientists to define project objectives and ensure alignment. Delivered data-driven insights that resulted in a 10% improvement in user engagement through personalized content recommendations.

Web Developer – Internship

Code Clause

Remote
Nov 2023 – Dec 2023

Description: As an Internship Web Developer, I am currently engaged in developing a comprehensive website and user control panel for a NGO Community. This project involves creating a dynamic and interactive user interface to enhance user and administrative experience.

Key Contributions:

- The NGO Website Development project aims to create a user-friendly platform, featuring registration and login functionalities for users.
- It includes an About Us page, providing mission details, and a Contact Us page for seamless communication.
- The project goals are to establish an online presence, enhance engagement, foster transparency, and improve communication while ensuring accessibility across devices.

PROJECTS

Dev-Search

Tech Stack: HTML, CSS, Java-script, Python

Description: Dev-Search is a developer-focused platform offering authentication, messaging, and project management, built with HTML, CSS, and Python.

Key Learning and Accomplishment:

- Gained hands-on experience in full-stack development using HTML, CSS, and Python.
- Learned to implement user authentication, authorization, and secure session management.
- Built and integrated real-time messaging and project management features into a dynamic web platform.
- Developed a deeper understanding of creating intuitive, user-friendly interfaces for complex web applications.

E-Commerce

Tech Stack: HTML, CSS, Java-script

Description: Managed the development and maintenance of an e-commerce website, ensuring seamless user experience, secure transactions, product management, and continuous updates to boost customer engagement and sales.

Key Learning and Accomplishment:

- Developed and maintained product listings, checkout flows, and secure payment integrations.
- Optimized website performance for speed, SEO, mobile responsiveness, and user engagement.
- Managed product data, coordinated promotions, and collaborated with design and marketing teams.
- Analyzed user behavior, conducted A/B testing, resolved issues, and implemented updates.

TECHNICAL SKILLS

- Java
- Selenium
- JIRA
- HTML/CSS
- Java-script
- Python
- Power-BI
- ZOHO Creator

Certificates

- Full Stack Java Developer (Ducat, India)
- JavaScript (IIT Bombay)
- O level (NIELIT)
